Diplomacy meets Digitalization
17th September 2020, 8.30 – 10.00 am
Café 1687, Mittelstr. 30, 10117 Berlin

Ost-Ausschuss - Osteuropaverein is deeply involved in digital transformation issues. Among our twenty-nine partner countries a high dynamic developed in the previous years. Innovation Hubs rose and working successfully in almost every country. In lots of cases the public sector started initiatives to digitize services for citizens and companies.

During our fourth Diplomacy meets Digitalisation, we will focus on digital health solutions to support decision makers, medical staff and institutions in the health sector. We would like to discuss secure health data management systems such as digital patient records, and technologies like blockchain and artificial intelligence in healthcare. Technology and technology-based solution could support building a better health system and help predicting, preventing, diagnosing and treating diseases and pandemics like the current Covid-19.

We are honoured, that our fourth „Diplomacy meets Digitalization“ will be held under the patronage of the ***Ambassador Extraordinary and Plenipotentiary of the Republic of Estonia, H.E. Alar Streimann.***

Ambassadors of all 29 partner countries are highly welcome to join the event and to use the opportunity to exchange views, project ideas and events to come with representatives of the association's members and representatives of the German Federal Government and Members of Parliament. The working language is English.
